Upstream

Adif Zulkifli
Executive Vice President and Chief Executive Officer, Upstream

“The year 2021 saw the industry stabilise and start to recover from the shocks of 2020, albeit in a shroud of uncertainty as the world continued to grapple with multiple waves of COVID-19. Valuable lessons were learnt about our vulnerability as a business, driving us to step up our efforts to ensure that we continue to be resilient in providing the world with the energy security it needs. This resilience begins with ensuring the health, safety and security of our employees and those they work with; we are proud to maintain our solid HSE record, true to our goal that “everyone goes home safely”, every time.

Recognising that we have a large part to play supporting PETRONAS’ net zero carbon emissions by 2050 (NZCE 2050) aspiration, while balancing the obligation to deliver energy to the world, the Upstream business has stepped up its efforts in lowering our carbon footprint, with several projects underway to achieve zero continuous flaring and venting, an increased level of digitalisation towards energy-efficient operations, and a marked level of collaboration with leading industry players to advance carbon capture and storage (CCS) technologies and solutions.

We believe that Upstream will continue to be PETRONAS’ main cash generator that will provide crucial support for the Group’s sustainability aspirations. As the custodian of Malaysia’s hydrocarbon resources, we continue to increase Malaysia’s resource base through efforts such as the Malaysia Bid Round (MBR), bringing in responsible investors who share the same pragmatic approach in providing the world with affordable energy via a safe, resilient, low cost and lower carbon exploration and production.”

Made
10 exploration discoveries

Achieved first hydrocarbon for
21 projects

Achieved Final Investment Decision (FID) for
22 projects

GHG emissions reduction
3.83 million tCO₂e (8 projects completed)

Total daily production average (boe) per day
2,275

Total Contingent Resources (2C)
15.34 Bboe

Total Petroleum Reserves (2P)
9.11 Bboe

Reserves Life Index (ORLI) Life Index (RLI)
39.7 years

More than
10,000 employees

9.8 years

Business Review
Our Upstream business is involved in the exploration and development of hydrocarbon resources and the operations of oil and gas production assets, with a growing international presence in over 20 locations across the globe. In Malaysia, through Malaysia Petroleum Management (MPM), we regulate and manage the country’s petroleum resources. We spearhead the growth and development of the nation’s oil and gas industry.

The Upstream business continues to deliver results operationally through strategic and decisive measures. We adopted digitalisation and technology in the way we work to deliver business excellence. We reduced costs and maintained liquidity, strengthening our portfolio by encouraging more value-driven exploration and development of discovered resources to promote a vibrant oil and gas landscape.

**Key Priorities**

**Sustainable Supply**
- Ensured a sustainable supply of energy to stakeholders.

**Portfolio Expansion**
- Grew business portfolio as part of our global strategy.

**Results**

- Recorded a total daily production average of 2,275 barrels of oil equivalent (boe) per day.
- Achieved first hydrocarbon for 21 projects – 14 in Malaysia (12 Brownfield, 2 Greenfield) and 7 abroad – 2 Greenfields (in Turkmenistan and Brazil), 5 Brownfields (2 in South Sudan, 1 in Chad, 1 in Myanmar and 1 in Indonesia).
- Achieved Final Investment Decision (FID) for 22 projects; in Malaysia (18), Indonesia (2), Brazil (1) and Turkmenistan (1).
- A total of 10 exploration discoveries were made in 2021 of which eight discoveries contributed to our resource addition namely in Malaysia, Indonesia and Brunei.
- Signed seven Production Sharing Contracts (PSCs) in Malaysia, attracting four new investors.
- Awarded six of the 13 offshore exploration blocks offered in the Malaysia Bid Round (MBR) 2021. MBR is an annual Malaysia licensing round hosted by MPM which offers investors diverse upstream opportunities.
- Expanded footprint in Brazil with the acquisition of the Sépia field, located in the Santos Basin. This marks PETRONAS Petroleum Brasil Ltda’s entry into the prolific basin, strengthening its ventures in the country and presence in the Americas.
- Secured a 20-year extension for the Jabung Production Sharing Contract. With the extension, PETRONAS Cargai (Jabung) Ltd will continue to add value to Indonesia’s energy industry and grow its business portfolio in the region.
- Acquired 10 per cent participating interest from JAPEX Montney Ltd in the North Montney Joint Venture (NMJV), bringing PETRONAS Energy Canada Ltd’s interest to 72 per cent, up from 62 per cent.
- Signed the Block 29 Production Sharing Contract in Angola, which expands our presence in West Africa.
- Signed a Multi-Well Participation Agreement with Chevron USA Inc for participation in exploration acreages in the US Gulf of Mexico in line with PETRONAS’ continuous efforts to explore opportunities in the Americas.

**Technology-Driven Operational Excellence**
- Leveraged technology, digitalisation, and intelligent facilities to reduce costs and increase productivity and efficiency to drive informed decision-making.
- Harnessed data to gain integrated, end-to-end visibility across key markets and data centres for better decision making on new discoveries and new block acquisitions.

- Gained incremental production of 1,320 barrels of oil equivalent per day (boe/d) from Brownfields via Digital Fields solutions that unlock production enhancement opportunities leveraging on artificial intelligence and machine learning technologies.
- Achieved cost avoidance of RM17.5 million in production maintenance and drilling operations through execution of predictive maintenance and machine learning technologies across Malaysia Assets namely Baronia, Baram, D35 and Angsi.
- Enabled 30 per cent process efficiency improvement at Dulang, Belud, PC4, Baronia, Tukau Timur and PM Gas fields via a cloud-based Software as a Service (SaaS) solution with LiveFDP that allows secured data accessibility to users.
- Implemented non-intrusive inspection of TharJath export pipeline using Magnetic Tomography Method (MTM) technology for Sudd Petroleum Operating Company (SPOC) which lowered the risk of pipeline failure and shorten the duration of inspection campaign compared to conventional method. This resulted in a safe production resumption, six weeks earlier than scheduled.
- Replication of Physical Asset Management (PAM) digital solutions such as PROTEAN (real time alerts), VINCI (digital inspection reporting), SICS (digital risk ranking and prioritisation) in Turkmenistan and Iraq operations enabled faster, accurate and transparent decision making, which improves overall process cycle efficiency.
Business Review

Key Priorities and Results

Health and Safety
- Robust management of COVID-19 cases among employees and contractors to ensure business continuity at our areas of operations.
- Fostered Generative HSE Culture at all our areas of operations.

Sustainability
- Operational Excellence and Collaboration to lower overall carbon footprint.

Business Review

1. Reserves and Contingent Resources volumes based on a new gas to oil-equivalent conversion factor of 5,650 scf = 1 boe. The new conversion factor results in an approximately 5 per cent increase in Reserves and Contingent Resources volumes across all levels of uncertainty.

Capital Deployed:
- Operational Excellence and Sustainability

• Fostered Generative HSE Culture
• Robust management of COVID-19 Health and Safety
• Development of host nation’s oil and gas industry.

Results

- Introduced the My Personnel e-Tracker (MyPeIT) app, designed for more than 10,000 oil and gas personnel in Malaysia. The app allows for real-time check-in and tracking of COVID-19 vaccination and health status from embarkation to disembarkation points at various offshore locations in the country.
- Recorded the best HSE performance in terms of major HSE incidents in five years.
- PETRONAS Carigali Sdn Bhd received 15 Gold Merit Awards and six Gold Class 1 Awards at the 59th Malaysian Society for Occupational Safety & Health Award ceremony for its HSE performance.
- Completed eight GHG emissions reduction projects estimated to reduce GHG emissions by 3.83 million tonnes of carbon dioxide equivalent (tCO₂e) annually from Upstream operations in Malaysia with estimated value creation of RM161 million per annum. This includes the integrated Boi-keri-Betty project, located off the coast of Sarawak which achieved zero continuous flaring of hydrocarbon while monetising the recovered flared and vented gases.
- Signed three agreements with industry partners to explore carbon capture and storage technologies as well as carbon dioxide (CO₂) storage solutions to decarbonise Malaysia’s upstream sector and provide CO₂ storage solutions for the region. The partners are ExxonMobil Exploration and Production Malaysia Inc, Sarawak Shell Berhad and POSCO International Corporation and POSCO Engineering & Construction Co Ltd.

Moving Forward

Throughout 2021, the upstream business experienced volatility due to the pandemic and geopolitical tensions that disrupted output from key producers. In 2022, the adoption of cleaner alternatives is expected to accelerate, given growing calls to decarbonise the sector. Production is expected to increase as governments worldwide focus on increasing the security of energy supply.

Upstream will continue to execute its plans anchored on making sure our business is safe, resilient, low cost and low carbon.

Moving forward into 2022, our key focus areas include:

• Malaysia
  Our plan to revitalise Malaysia’s E&P landscape remains imperative in ensuring continued growth and to make Malaysia a home for dynamic and robust investors. Focused efforts such as the Malaysia Bid Rounds would offer investors attractive exploration blocks and discovered fields, with innovative fiscal terms. In addition to these efforts, Late Life Assets and Small Field Assets are being effectively managed through techno-commercial solutions with simplified processes and governance.

• International
  – Canada
    PETRONAS has a unique integrated position in Canada that allows maximising our value from Upstream production to LNG markets. Moving forward, PETRONAS will continue focusing on monetising its competitive resources while leveraging on the growing gas demand markets in North America and globally.
  – Mexico and Brazil
    We will pursue and realise material growth in Mexico and Brazil by focusing on exploration activities with a clear path to monetisation to build a value driven portfolio. Key efforts are being put in place to realise planned resource addition while we continue to be a safe operator and partner, leveraging on our synergy with partners and host authorities.

• Carbon management
  In delivering the aspiration towards a low carbon Upstream business, the establishment of a centralised Carbon Management Division (CMD) shall drive carbon capture and storage and physical decarbonisation at pace. This is in alignment with PETRONAS’ NZCE 2050 aspiration to maximise value while executing sustainable production through physical decarbonisation of Upstream activities, monetising resources from high carbon dioxide fields and delivering carbon dioxide storage facilities. Additionally, CMD is empowered to deliver carbon capture and storage business to generate new revenue for Upstream and PETRONAS.

• Technology and digitalisation
  There will be continued focus and investments being placed on key technologies to further compress cost while maintaining asset integrity and reliability. This includes the development and adoption of robotic inspection tools, online sensors, and advanced materials as part of the new way of working in Upstream.

The development of new competitive advantages is being supported through rigorous R&D efforts and digitisation of the Upstream ecosystem to help address the pain points and achieve higher operational efficiency. We are determined to create an agile, secure and trusted digital ecosystem that is fundamental to the new way of working in a data-driven organisation.
