

## Memberships and Associations

As we move forward in supporting the global agenda, we believe that building relationships through trust and respect is crucial. We continuously explore and actively participate in professional associations, events, and memberships to strengthen our sustainability efforts, aligned with our strategic direction and Net Zero Carbon Emissions by 2050 (NZCE 2050) Pathway. Through our participation and engagements, we are able to better understand the concerns that need to be addressed and identify ways in which we could do to help. Our aim is to contribute to the nation-building of Malaysia and create a positive impact across industries and society.

In 2022, we further demonstrated our commitment to the industry through three additional involvements. We became a member of the Energy Transitions Commission where we aim to strengthen our leadership role in championing the energy transition agenda in Malaysia as well as in the ASEAN region.

We also affirmed our methane commitments by joining United Nation's Environment Programme (UNEP) Oil and Gas Methane Partnership 2.0 (OGMP2.0) Framework. It is a comprehensive, measurement-based reporting framework that improves the accuracy and transparency of methane emissions reporting in the energy sector.

We also joined the International Renewable Energy Agency (IRENA)'s Alliance for Industry Decarbonisation alongside other global companies across industrial sectors. The Alliance aims to contribute to the achievement of country-specific net-zero goals, foster action for decarbonisation of industrial value chains and enhance understanding of renewables-based solutions and their adoption by industry.

Further details on Memberships and Associations can be referred to on our website <https://www.petronas.com/sustainability/our-approach-to-sustainability>.
