Figure 2: Map to showcase PETRONAS’ biodiversity conservation efforts through Social Impact around the world*

For 2022, we included reporting of PETRONAS Malaysia’s operation site in Protected Areas and Key Biodiversity Areas. The activity was conducted utilising data from Integrated Biodiversity Assessment Tool (IBAT). The summary of results is shown as per Table 1 below:

Type of protected area	Within the boundary	Near (1-10km) (up to 10km outside of boundary of protected area/key biodiversity area)
World Heritage Site	0	0
Ramsar Site	0	0
IUCN Protected Area Category I-VI*	5	29
Key Biodiversity Area	1	2

Table 1: PETRONAS Malaysia’s Operations within/near Protected Areas and Key Biodiversity Areas.

* International Union for Conservation of Nature (IUCN) Protected Area categories are as below:

- Ia Strict nature reserve
- Ib Wilderness area
- II National park
- III Natural monument or feature
- IV Habitat/species management area
- V Protected landscape or seascape
- VI Protected areas with sustainable use of natural resources

IUCN management categories are voluntary for countries to apply to their protected areas and are not being used by all countries. However, for the purpose of standardisation of reporting for PETRONAS operations globally, these categories will be used.
