### Profit before Tax

**RM27.2b**

Q1 FY2014 performance against same period last year was impacted by:

- fall in price offset by improved production and supported by favourable movement of the USD exchange rate against the Ringgit
- impairments – mainly Egypt
- higher operational costs due to increased exploration activities and costs incurred for LNG imports for RGT

¹EBITDA consists of profit before taxation and non-controlling interests, with the addition of amounts previously deducted for depreciation, amortisation and impairment loss on property, plant and equipment and intangible assets and financing costs, and the exclusion of interest income.
